

Mormugao Port Trust wins SAP ACE Award

Mormugao Port Trust has implemented Port Operating System using SAP to provide State of Art technology to all the Port Users and designated Banks. This System provides Enterprise Portal to all the Users and the designated Banks using which they can transact their day to day business like sending request for services they require from Port, make payments through Banks, get the bills on line and get reports online and so on.

SAP based Port Operating system was made operational since April 2011. This system has allowed the Agents and Banks to carry out business transactions from their offices, thereby saving travelling time and manpower.

In addition to Port Operations, SAP implementation includes finance, payroll, materials management, plant maintenance, project systems, real estate, document management and so on. These modules were made live in December 2009.

This project was successful due to support from Chairman, Dy. Chairman, all the HODs, officers and staff members of Mormugao Port Trust.

Dedicated efforts of Abhay Kesarkar, Dy Director (EDP), Project Manager for SAP implementation , officers and other staff members from IT Cell and Core team members from all the Departments helped in making this project a grand success.
