CIRCULAR

SUB: Reception facility for oily bilge water and waste oil

Please refer to our circular No.DC/S-21/2004/122 dated August 12/13, 2004 on the above subject.

Reception tank of 5 cu.m. capacity to receive oily bilge water and waste oil from barges and small crafts has been installed at No.10 berth adjacent to the I.O.C. bunkering point.

All barge owners, passenger launch owners and fishing boat owners are advised to instruct their Masters to pump their oil bilge water and waste oil into the reception tank. Due care needs to be taken while transferring the oil water/waste oil to ensure that it is not spilled in water or around the reception tank.

The service for reception of oily water/waste oil is being provided free of cost to encourage barge, passenger launch and fishing boat owners/operators to make maximum use of the same and prevent pollution of the sea and inland waters of Goa

(CAPT. ANIL PANJWANI)
DEPUTY CONSERVATOR
